I. REVIEW OF THE POWER INDUSTRY

In the first half of 2025, China had witnessed safe and stable operation of the power system, with power supply continuing its green and low-carbon transition. Power consumption remained stable with steady progress and improvement, and the overall balance between power supply and demand was maintained. According to statistics from the China Electricity Council and the National Energy Administration, total national electricity consumption in the first half of 2025 reached 4.8 trillion kWh, representing a period-on-period increase of 3.7%.

By the first half of 2025, the national electricity installed capacity in total reached 3.65 billion kW, representing a period-on-period increase of 18.7%, of which the installed capacity of non-fossil fuel power generation reached 2.22 billion kW, up 29.8% period-on-period, accounting for 60.9% of the total installed capacity. The installed capacity of wind power generation reached 570 million kW, up 22.7% period-on-period, while the installed capacity of photovoltaic power generation reached 1.10 billion kW, representing a period-on-period increase of 54.2% (of which the installed capacity of distributed photovoltaic power generation reached 490 million kW, up 58.1% period-on-period). The total installed capacity of wind power generation and photovoltaic power generation was 260 million kW, accounting for 89.9% of the total newly added power generation capacity. From the perspective of investment by type, growth rates of power generation capacity and structural changes, the power industry has achieved significant progress in its green and low-carbon transition.

In the first half of the year, the power generation of power plants above the national scale reached 4.5 trillion kWh, representing a period-on-period increase of 0.8%. Non-fossil fuel power generation accounted for 43.1% of total power generation, up 3.7 percentage points period-on-period. Among these, on-grid wind power and photovoltaic power generation increased by 10.6% and 20.0% period-on-period, respectively. In the first half of the year, the power trading centers across the country managed to organise electricity transactions of 3.0 trillion kWh in the market, F4(i)0.5(n ho)0.5(r5(n ho)0.5

MANAGEMENT DISCUSSION AND ANALYSIS

II. BUSINESS REVIEW FOR THE FIRST HALF OF 2025

In the first half of 2025, the Group remains committed to its core mission of ensuring energy security and promoting green and low-carbon transition in the national capital. Adhering to the “seeking rapid and optimal progress while maintaining stability”, we actively address challenges such as declining gas-fired power prices and intensified curtailment of wind and photovoltaic power generation. As a result, our operational performance has achieved both quantitative and qualitative growth, and we have taken solid steps toward high-quality development.

1. Operating scale continues to grow steadily, with the gas-fired power generation segment demonstrating resilience

The Group’s operating scale showed a steady upward trend. As of 30 June 2025, total assets reached RMB103.95 billion, representing an increase of 2.9% from the beginning of the year, with asset scale growing continuously. Despite a complex operating environment, the Group achieved total operating revenue of RMB10.9 billion, representing an increase of 2.9% period-on-period.

The gas-fired power generation segment in Beijing operated smoothly, with all indicators showing steady growth. In the first half of the year, the gas-fired power generation and heat supply segment generated 9.72 billion kWh of electricity, representing a period-on-period increase of 2.3%. Utilisation hour of equipment reached approximately 2,036 hours, up 17 hours period-on-period, higher than the national average level of 1,029 hours. Operating revenue contributed RMB6.58 billion, up 2.0% period-on-period. The Group has demonstrated strong resilience in its gas-fired power generation segment through measures such as upgrading equipment and expanding heating supply coverage. Among these, Beijing Jingneng Gaoantun Gas-fired Thermal Power Co., Ltd. saw a period-on-period increase of 280 million kWh in power generation, representing a growth of 19%, with significant improvement in production capacity utilisation efficiency; Beijing Jingqiao Thermal Power Co., Ltd. (“Jingqiao Thermal Power”) achieved a period-on-period decrease of 0.6% in comprehensive power supply gas consumption, highlighting the in-depth efficiency of refined management; Beijing Shangzhuang Gas-fired Thermal Power Co., Ltd achieved a period-on-period profit surge of 26.9% driven by innovative business initiatives, providing a practical model for the transformation and upgrades of gas-fired power plants.

2. Installed capacity continues to expand, power generation steadily increases, and operation efficiency of units continues to improve

As of 30 June 2025, the Group's total installed capacity has steadily increased to 17,914 MW, representing a period-on-period growth of 21.4%. The installed capacity of non-fossil energy sources reached 13,139 MW, accounting for 73.3% of the total installed capacity, further optimising the energy structure. Among these, the wind power generation segment had an installed capacity of 7,048 MW, with an additional 190 MW of new installed capacity added as compared to the year end of 2024; the photovoltaic segment had an installed capacity of 5,555 MW, with an additional 287 MW of new installed capacity added. The Group's ongoing projects had an installed capacity of 2,056 MW, all of which were renewable energy projects.

The Group's total power generation for the first half of the year was 21.87 billion kWh, representing an increase of 8.8% period-on-period. Among which, the wind power generation segment generated 8.49 billion kWh, representing a period-on-period increase of 18.9%, with the utilisation hour of equipment of approximately 1,240 hours, exceeding the national average level of 153 hours. The photovoltaic power generation segment generated 3.36 billion kWh, up 17.4% period-on-period, with the utilisation hour of equipment of approximately 680 hours, exceeding the national average level of 120 hours.

3. New progress made in strategic and emerging projects, with steady progress in project development

Faced with the new policies and requirements for the full implementation of market-based reform of new energy on-grid tariffs and electricity volumes in China, the Group accurately assessed the impact of the policy and systematically promoted the development of incremental projects. The Group obtained newly approved or filed renewable energy development quota of 540 MW, during the six months ended 30 June 2025 (the "Reporting Period"), with a reserve project capacity of more than 10,000 MW.

In terms of strategic and emerging projects, the first phase of the 1,500 MW project construction under the 4,900 MW windbreak and desertification control project in Xilingol League has been fully launched, pioneering a new model of "green power production + ecological restoration" synergy. By the first half of the year, a 100 MW project had been fully connected to the grid; the submarine cable routing plan for the Shantou offshore wind power project has been reviewed by relevant authorities and submitted to relevant international organizations for further consultation; the National Energy Administration has approved the optimization and adjustment of the layout of pumped storage projects to serve the power system for the Mentougou pumped storage project; a cooperation agreement has been signed for the "Hulunbuir-Xing'an League Green Power to Beijing" project; a task force has been established for the preliminary work of the "Ningxia Green Power to Beijing" base project, and is currently launching the investigation of key resources covered by the power transmission planning.

In terms of the advantageous regions surrounding Beijing, we have completed the resource survey for centralized wind power and photovoltaic power generation under the "Chengde Green Power to Beijing" project, analyzing the wind and photovoltaic resources surrounding the collection stations; we are currently conducting project initiation study on the supporting transmission lines for the "Jing-Zhuwo Power to Beijing" project. A survey of resources around the substation has been launched. We have completed the scheme design and economic feasibility analysis for the "Guanting replacing small with large" project and are preparing to commence preliminary work. Approval has been obtained from the development and reform authorities for the photovoltaic project of the Zhongguancun (Yanqing) Low-Carbon Industrial Park Integration.

MANAGEMENT DISCUSSION AND ANALYSIS

4. Empowering innovation with digital intelligence to build a new green energy productivity model

In the first half of 2025, the Group has driven comprehensive upgrades in production and management through technological innovation and digital transformation.

In terms of technological innovation, the Group focuses on optimizing equipment performance and applying new energy technologies. Through a series of independent research and development efforts and engineering practices, the Group has significantly improved the reliability and economic efficiency of its energy systems. The Beijing Branch has improved power generation capacity by conducting detailed power curve reviews and optimising unit control strategies. The Northwest Branch has implemented blade extension and preventive replacement of generators for older units, continuously enhancing power generation capacity and significantly reducing failure rates, ensuring the sustained stable operation of wind farms. In the field of new energy technologies, branches have innovatively introduced unmanned aerial vehicle intelligent inspection systems to monitor equipment status in real time, enhance equipment monitoring efficiency, identify potential issues early, and reduce unplanned downtime.

In terms of digital transformation, the Group has built a digital ecosystem covering the entire business chain with the “Smart Energy Management Platform” at its core. The power marketing and control system launched by the Beijing Branch integrates spot trading and green certificate management modules, dynamically optimizing electricity pricing strategies; the distributed photovoltaic intelligent operation and maintenance platform developed by the Beijing Jingneng Comprehensive Energy Co., Ltd. has reduced fault localization time by 80%; The AI-enabled safety production project of Beijing Jingxi Gas-fired Power Co., Ltd. (“Jingxi Gas-fired Power”) has established a safety production management platform integrating functions such as gas turbine operation optimization, full-process maintenance control, personnel behavior recognition, and violation detection, providing a benchmark case for intelligent safety management for peer companies and driving the overall improvement of industry safety management standards. Technological breakthroughs and digital transformation have reshaped operational management models, enhanced operational efficiency, and provided the technological foundation for the Group to seize opportunities in the new power market.

5. Conduct in-depth research on marketing strategies and actively respond to the reform of the electricity market

In the first half of 2025, the Group closely monitored the new policies for electricity market reform in all regions, conducted policy research, analyzed policy trends and directions, assessed the impact of changes in market trading mechanisms on electricity prices, and promptly carried out electricity price trend analysis, power generation situation forecasting, and method decision on trading modes. For existing asset marketing data, a sensitivity analysis model was established to accurately and comprehensively collect market transaction data and strengthen volume-price analysis; the Group actively engaged in high-priced transactions such as inter-provincial and inter-regional transactions and green power supply to Beijing. Through multi-year green power transactions with Beijing power users, the Group facilitated the supply of 250 million kWh of green power from the Xilingol Phase II project to Beijing. The Group completed Beijing's first new energy substitution transaction for the reduced electricity volume of gas-fired generating units, with a transaction volume of 460 million kWh, achieving a mutually beneficial situation between Beijing's gas-fired power plants and new energy sources outside Beijing, which has reaped favorable economic returns. In conjunction with the "green power direct connection" policy, the Group explored direct transaction models with power-consuming enterprises to enhance local consumption levels and meet the green energy needs of power-consuming enterprises.

6. Multi-dimensional measures boost market confidence, and proactivity creates value

In the first half of 2025, the Group fully implemented its market capitalization management tasks set at the beginning of the year, actively communicating with investors, completing roadshows in Hong Kong, Singapore, Beijing and Shanghai, and hosted visits from nearly 50 domestic and overseas institutions. It listed "inclusion in the Hang Seng Index and Stock Connect" as a strategic goal, with increasing market capitalization as its main task, and actively explored the plan for "full circulation". With the aim of "maximizing shareholder value", the Group announced a three-year shareholder dividend plan and actively explored diversified market value management tools. It strived to propel a stabilization and recovery of market value through a combination of "strategic upgrades + profit growth + dividend increases".

MANAGEMENT DISCUSSION AND ANALYSIS

III. BUSINESS OUTLOOK FOR THE SECOND HALF OF 2025

2025 is the final year of the “14th Five-Year Plan” and an important year for achieving a comprehensive leap in the high-quality development of the Group. The Group will proactively adapt to new situations such as the accelerated construction of new power systems, the continuous deepening of power market-oriented reforms, the increasing pressure of new energy consumption and the heightening risk of market-oriented fluctuations in electricity tariffs, and will constantly adhere to the principle of seeking rapid and optimal progress while maintaining stability, continuously coordinate the relationship between quality and scale in development, making every effort to promote promote cfsyo etriency4(oe)-3.8()XJ0.6

2. Enhance market-oriented marketing capabilities and optimise transaction strategies

The Group will focus on enhancing its market-oriented marketing capabilities. By leveraging cutting-edge meteorological large-scale models in the industry, the Group will develop its own wind and solar power forecasting platform and market load forecasting platform to provide high-precision predictive data for power marketing activities, accurately track price trends, and maximize operational efficiency. Through regular training programs, the Group will strengthen policy interpretation and operational review to address the challenges posed by the full liberalization of the market. In terms of trading strategies, the Group will rely on precise data forecasting to compare transaction outcomes across different scenarios and projected benefits in various markets, striving to secure the maximum high-price electricity transactions. Regarding electricity price management, the Group will implement a differentiated pricing mechanism, distinguishing between regions, project types, and years of operation, to establish personalized electricity allocation and trading strategies. The focus will be on securing premium prices for green electricity transactions, striving to ensure that the projects can achieve higher returns.

3. Focus on promoting projects of green power to Beijing and large-scale base, reserving increment projects for the 15th Five-Year Plan

The Group will vigorously promote the green power projects to Beijing and large-scale base projects, fully leveraging the huge demand of Beijing for renewable energy to systematically advance the development of projects within Beijing and those green power projects supplying to Beijing. In terms of green power supply to Beijing, the focus is on advancing resource surveys and planning for the green power supply channels to Beijing from Chengde and Hulunbuir-Xing'an League, and closely following up on the progress of Ningxia's green power supply to Beijing

MANAGEMENT DISCUSSION AND ANALYSIS

IV. OPERATING RESULTS AND ANALYSIS

1. Overview

In the first half of 2025, the Company recorded profit for the period of RMB2,070.6 million, representing a decrease of 5.32% as compared with RMB2,187.0 million for the first half of 2024. Profit attributable to the equity holders amounted to RMB1,982.7 million, representing a decrease of 4.98% as compared with RMB2,086.7 million for the first half of 2024.

2. Revenue

The total revenue increased by 2.91% from RMB10,591.4 million for the first half of 2024 to RMB10,899.7 million for the first half of 2025, due to the increase in electricity sales volume from the projects in the wind power segment and the photovoltaic power segment.

Gas-fired Power and Heat Energy Generation Segment

The revenue from the gas-fired power and heat energy generation segment increased by 2.05% from RMB6,449.2 million for the first half of 2024 to RMB6,581.1 million for the first half of 2025, of which, revenue from sales of electricity increased by 2.61% from RMB5,171.5 million for the first half of 2024 to RMB5,306.5 million for the first half of 2025, due to the increase in sales volume of electricity of this segment. Revenue from sales of heat energy decreased by 0.23% from RMB1,277.7 million for the first half of 2024 to RMB1,274.7 million for the first half of 2025.

Wind Power Segment

The revenue from wind power segment increased by 9.21% from RMB2,457.1 million for the first half of 2024 to RMB2,683.5 million for the first half of 2025, due to the increase in average wind speed period-on-period, resulting in the increase of electricity sales volume of the segment.

Photovoltaic Power Segment

The revenue from photovoltaic power segment increased by 1.41% from RMB1,514.0 million for the first half of 2024 to RMB1,535.4 million for the first half of 2025, due to increased solar radiation in this segment, resulting in the increase of electricity sales volume of the segment.

Hydropower Segment

The revenue from hydropower segment decreased by 49.79% from RMB141.2 million for the first half of 2024 to RMB70.9 million for the first half of 2025, due to certain hydropower plant shutdown, leading to a significant decline in electricity sales volume.

Other Segment

Other operating income principally comprises revenue from finance lease business and equipment repairs and maintenance. Other operating income decreased by 4.01% from RMB29.8 million for the first half of 2024 to RMB28.8 million for the first half of 2025, due to a decrease in revenue from external finance lease.

3. Other Income

Other income decreased by 32.85% from RMB222.2 million for the first half of 2024 to RMB149.2 million for the first half of 2025, due to the expiration of the original power purchase agreement in Australia, with only a portion of the electricity participating in the newly signed power purchase agreement, while the remaining electricity was sold at market prices. Additionally, the market price for the green certificate component of the power purchase agreement saw a significant period-on-period decline, resulting in a period-on-period decrease in carbon emission reduction revenue.

4. Operating Expenses

Operating expenses increased by 4.03% from RMB7,690.9 million for the first half of 2024 to RMB8,001.2 million for the first half of 2025, due to a decline in the share prices of the H shares of CGN Power Co., Ltd. (hereinafter referred to as "CGN") held by the Group, the receipt of hydropower plant shutdown subsidy in the first half of 2024, and adjustments to depreciation policies.

Gas Consumption

Gas consumption increased by 3.35% from RMB4,743.5 million for the first half of 2024 to RMB4,902.4 million for the first half of 2025, due to an increase in gas consumption as a result of the increase in sales volume of electricity by the gas-fired power and heat energy generation segment.

Depreciation and Amortization Expense

Depreciation and amortization expense decreased by 8.42% from RMB2,034.8 million for the first half of 2024 to RMB1,863.4 million for the first half of 2025, due to an adjustment of the depreciation policy of fixed assets.

Personnel Cost

Personnel cost increased by 4.05% from RMB535.4 million for the first half of 2024 to RMB557.1 million for the first half of 2025, due to the personnel costs expensed by the newly commissioned projects.

Repairs and Maintenance

Repairs and maintenance increased by 8.30% from RMB174.7 million for the first half of 2024 to RMB189.2 million for the first half of 2025, due to major overhauls of gas-fired power generation and heating units.

MANAGEMENT DISCUSSION AND ANALYSIS

Other Expenses

Other expenses principally comprise (1) external purchase of power, water and materials, etc.; (2) property management, greening and fire protection fees; (3) rental expenses; (4) underwriting fees, bank commissions; (5) intermediary service fees; (6) property insurance premium; and (7) other miscellaneous operating expenses.

Other expenses decreased by 11.93% from RMB543.0 million for the first half of 2024 to RMB478.2 million for the first half of 2025, due to the remarkable results from the Group's effort in cost reduction and efficiency enhancement.

Other Losses and Gains

In the first half of 2025, other losses amounted to RMB11.0 million, primarily due to fair value changes resulting from the decline in the prices of CGN shares held by the Group; in the first half of 2024, other gains amounted to RMB340.6 million, primarily due to compensation received from the closure of hydropower plants and gains from fair value changes resulting from the increase in the share prices of CGN.

5. Profit from operations

As a result of the above, operating profit decreased by 2.40% from RMB3,122.6 million for the first half of 2024 to RMB3,047.6 million for the first half of 2025.

Wind Power Segment

The operating profit of wind power segment increased by 8.25% from RMB1,384.7 million for the first half of 2024 to RMB1,498.9 million for the first half of 2025, due to the increase in the average wind speed of this segment.

Gas-fired Power and Heat Energy Generation Segment

The operating profit of gas-fired power and heat energy generation segment increased by 10.73% from RMB899.7 million for the first half of 2024 to RMB996.2 million for the first half of 2025, due to the increase in sales volume of electricity of this segment.

Photovoltaic Power Segment

The operating profit of photovoltaic power segment increased by 14.23% from RMB720.5 million for the first half of 2024 to RMB823.0 million for the first half of 2025, due to the increase in sales volume of electricity of this segment.

Hydropower Segment

The operating results of hydropower segment decreased from operating profits of RMB273.2 million for the first half of 2024 to the operating loss of RMB22.2 million for the first half of 2025, mainly due to the hydropower plant shutdown in the first half of 2024, resulting in the substantial decline of sales volume of electricity period-on period.

Other Segment

In the first half of 2025, other segments incurred an operating loss of RMB248.3 million, an increase of RMB92.8 million compared to the loss of RMB155.5 million in the first half of 2024, due to the decline in the share prices of CGN held by the Group.

6. Finance Costs

Finance costs increased by 2.12% from RMB599.3 million for the first half of 2024 to RMB612.0 million for the first half of 2025, due to the decrease in the interest expensed resulting from the increase in installed capacity at project companies.

7. Share of Results of Associates and a Joint Venture

Share of results of associates and a joint venture decreased from RMB60.4 million for the first half of 2024 to RMB58.3 million for the first half of 2025.

8. Profit before Taxation

As a result of the foregoing, profit before taxation decreased by 3.80% from RMB2,615.2 million for the first half of 2024 to RMB2,515.8 million for the first half of 2025.

9. Income Tax Expense

Income tax expense increased by 3.97% from RMB428.2 million for the first half of 2024 to RMB445.2 million for the first half of 2025.

10. Profit for the Period

As a result of the foregoing, profit for the period decreased by 5.32% from RMB2,187.0 million for the first half of 2024 to RMB2,070.6 million for the first half of 2025.

11. Profit for the Period Attributable to Equity Holders of the Company

Profit for the period attributable to equity holders of the Company decreased by 4.98% from RMB2,086.7 million for the first half of 2024 to RMB1,982.7 million for the first half of 2025.

MANAGEMENT DISCUSSION AND ANALYSIS

V. FINANCIAL POSITION

1. Overview

As of 30 June 2025, total assets of the Group amounted to RMB103,948.2 million, total liabilities amounted to RMB65,602.1 million and total equity amounted to RMB38,346.1 million, among which equity attributable to the equity shareholders amounted to RMB33,969.2 million.

2. Particulars of Assets and Liabilities

Total assets increased by 2.86% from RMB101,053.4 million as at 31 December 2024 to RMB103,948.2 million as at 30 June 2025, due to an increase in investment in newly-built projects. Total liabilities increased by 3.20% from RMB63,570.6 million as at 31 December 2024 to RMB65,602.1 million as at 30 June 2025, due to increased debt as a result of capital demand for construction of projects. Total equity increased by 2.30% from RMB37,482.8 million as at 31 December 2024 to RMB38,346.1 million as at 30 June 2025. Equity attributable to equity holders of the Company increased by 2.44% from RMB33,161.1 million as at 31 December 2024 to RMB33,969.2 million as at 30 June 2025, deriving from the accretion of business results in the first half of 2025.

3. Liquidity

As of 30 June 2025, current assets amounted to RMB26,410.0 million, including cash and cash equivalents of RMB7,975.6 million, trade and bills receivables of RMB15,971.8 million (mainly comprising receivables from sales of electricity and sales of heat), finance lease receivables of RMB336.7 million, and prepayment and other current assets of RMB2,125.9 million (mainly comprising deductible value-added tax and other accounts receivables).

Current liabilities amounted to RMB29,929.9 million, including short-term borrowings of RMB14,729.3 million, short-term debentures of RMB7,040.1 million, medium-term notes due within one year of RMB123.9 million, and bill and trade payables of RMB6,528.2 million (mainly comprising payables for construction projects and purchase of equipment, etc.). Other current liabilities amounted to RMB1,508.4 million, mainly comprising income tax payable and amounts due to related parties, etc.

Net current liabilities decreased by 13.08% from RMB4,049.5 million as at 31 December 2024 to RMB3,519.9 million as at 30 June 2025.

4. Net Gearing Ratio

Net gearing ratio, calculated by dividing net debts (total borrowings minus cash and cash equivalents) by the sum of net debts and total equity, decreased by 0.02 percentage point from 55.53% as at 31 December 2024 to 55.51% as at 30 June 2025.

The Group's long-term and short-term borrowings increased by 2.97% from RMB54,216 million as at 31 December 2024 to RMB55,824.5 million as at 30 June 2025, including short-term borrowings of RMB14,729.3 million, long-term borrowings of RMB26,937.6 million, medium-term notes of RMB7,117.5 million, and short-term financing debentures of RMB7,040.1 million.

Bank deposits and cash held by the Group increased by 7.76% from RMB7,401.6 million as at 31 December 2024 to RMB7,975.6 million as at 30 June 2025.

As of 30 June 2025, the Group had fixed-rate loan balances totaling RMB16,014 million.

VI. HUMAN RESOURCES SEGMENT

The Company upholds the management philosophy of “people-oriented and pursuit of excellence”, strives to create a harmonious working environment, and strengthens efforts in building of talents team. While focusing on the development of the Company, it attaches importance to staff training and employees’ benefits. The overall human resources condition of the Company in the first half of 2025 is summarized as follows:

1. SUMMARY OF HUMAN RESOURCES

The Group had a total of 3,145 employees as at 30 June 2025, maintaining a stable workforce size. The team structure continued to feature a “young and highly educated” workforce, providing robust human resources support for the Company’s business operations. Please refer to the following tables for details of the age and degree structure of employees:

(1) Age Structure:

MANAGEMENT DISCUSSION AND ANALYSIS

2. EMPLOYEES' INCENTIVES

The Company has further optimized its performance appraisal system for all employees, building upon the position-based responsibility system and centered around operational objectives. It has advanced the implementation of term-based contractual management to enhance quality and expand coverage, assigning management responsibilities to a broader range of personnel through tiered and categorized approaches. The "OKR + KPI" performance assessment model has been fully implemented, linking evaluation outcomes to compensation incentives, promotion opportunities, and selection for honors and awards. This approach fully unleashes the potential and morale of employees, thus achieving the coexistence of incentives and restraints.

Additionally, to: (i) enhance corporate competitiveness, foster a community of shared interests, fully mobilize the initiative, proactivity, and creativity of outstanding talents and core personnel, improve the Company's operating results and core competitiveness, and promote the Company's long-term stable development; (ii) release positive signals to the capital market, boost market confidence, and maintain the Company's market value; and (iii) effectively establish and continuously refine a management system characterized by clear delineation of powers and responsibilities and efficient decision-making, further refine the performance-based compensation incentive mechanism, establish a market-oriented assessment and evaluation system aligned with the Company's development needs, and effectively retain and attract core personnel essential to the Company's growth, the shareholders of the Company, at the extraordinary general meeting held on 2 February 2024, considered and approved the adoption of the H share appreciation rights scheme (the "Scheme") and the grants thereunder (the "Grant"). For the principal terms, conditions, and details of the Grant under the Scheme, please refer to the Company's announcement dated 12 December 2023, circular dated 17 January 2024, poll results announcement dated 2 February 2024, and insider information announcements dated 2 February 2024, 28 May 2024 and 31 October 2024.

3. EMPLOYEES' REMUNERATION

The Company continues to deepen income distribution reforms, adhere to a value-oriented approach, and increase the proportion of performance-based wages in enterprise wage budgets, ensuring that wage budgets are directly linked to core economic performance indicators. The Company has established differentiated wage-performance linkage metrics tailored to the functional positioning of different enterprise types, truly achieving the principle that "when performance improves, wages increase; when performance declines, wages decrease".

4. EMPLOYEES' TRAINING

The Company closely aligns with its talent development objectives, prioritizing the cultivation of a high-caliber team through personalized, targeted training to ensure a robust talent pipeline for business growth. Centered on the "3+3+X" training model, customized programs achieve 100% participation among the current employees. Centering on "Party building initiatives + dual carbon goals", major projects, and key engineering efforts, the Company collaborates with specialized institutions to deliver specialized theoretical and practical training. On-the-job training is prioritized to enhance the skill levels of young employees. By establishing a talent development system that integrates "competitions, mentorship, career advancement, and incentives", the Company fosters the emergence of outstanding talent.

5. EMPLOYEES' BENEFITS

The Company has made contributions to the social insurance and housing fund for its employees in strict compliance with the Labor Law, Labor Contract Law and Social Insurance Law. Meanwhile, the Group has also formulated related systems such as the Management Standards for Social Insurance and Housing Fund, Management Standards for Supplementary Healthcare, Management Standards for Occupational Health, Management Standards for Labor Welfare and Management Standards for General Labor Protective Equipment to increase the benefits of the Company and enhance employees' sense of belonging and happiness.

Notes:

- (a) According to the relevant requirements in the articles of association of the Company and its subsidiaries, a portion of its profits after taxation computed in accordance with the relevant accounting principles and financial regulations of the PRC ("PRC GAAP") will be transferred to statutory surplus reserve. The transfer to this reserve must be made before the distribution of a dividend to ordinary shareholders. Such statutory surplus reserve can be used to offset the previous years' losses, if any, or increase of the capital. The statutory surplus reserve is non-distributable other than upon liquidation.
- (b) Pursuant to certain regulations issued by the Ministry of Finance (財政部) and the State Administration of Work Safety (安全監管總局) of the People's Republic of China (the "PRC") on 21 November 2022, entities engaged in power generation are required to set up a safety fund based on certain percentage of prior year revenue for safety facilities and environment improvement, which is restricted for distribution to shareholders. Qualified safety expenditure can be transferred from safety fund to retained earnings subsequently.

UNAUDITED CONDENSED CONSOLIDATED STATEMENT OF CASH FLOWS

For the six months ended 30 June 2025

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 June 2025

1. GENERAL AND BASIS OF PRESENTATION

In preparing the interim financial report, the Directors of the Company have given careful consideration of the Group's net current liabilities of RMB3,519,884,000 as at 30 June 2025. The Group met its day-to-day working capital requirements through cash flows from operating activities and available banking facilities. Based on assessment, the Directors are of the view that the Group will be able to meet in full its financial obligations as they fall due in the foreseeable future. Accordingly, the interim financial report has been prepared on a going concern basis.

The interim financial report has been prepared in accordance with International Accounting Standard ("IAS") 34 Interim Financial Reporting issued by the International Accounting Standards Committee as well as with the applicable disclosure requirements of Appendix D2 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. Such interim financial report has not been audited.

The interim financial report is presented in Renminbi ("RMB"), which is the functional currency of the Company.

2. PRINCIPAL ACCOUNTING POLICIES

The interim financial report has been prepared on the historical cost basis except for certain financial instruments which are measured at fair values as appropriate.

Other than additional/change in accounting policies resulting from application of amendments to IFRS accounting standards and application of certain accounting policies which became relevant to the Group, the accounting policies and methods of computation used in the interim financial report for the six months ended 30 June 2025 are the same as those presented in the Group's annual consolidated financial statements for the year ended 31 December 2024.

Application of amendments to IFRS Accounting Standards

In the current interim period, the Group has applied the following amendments to IFRSs issued by the International Accounting Standards Board, for the first time, which are mandatorily effective for the annual period beginning on 1 January 2025 for the preparation of the Group's interim financial report:

Amendments to IAS 21	Effects of changes in exchange rates – Lack of exchangeability
----------------------	---

The Group has not early applied the new and amendments to IFRS Accounting Standards that have been issued but are not yet effective.

The application of the amendments to IFRS Accounting Standards in the current interim period has had no material impact on the Group's financial positions and performance for the current and prior periods and/or on the disclosures set out in these interim financial reports.

(ii) Performance obligations for revenue from contracts with customers

Majority of the sales of electricity to provincial power grid companies are pursuant to the power purchase agreements entered into between the Group and the respective provincial power grid companies. The Group's sales of electricity are made to these power grid companies at the tariff rates agreed with the respective provincial power grid companies as approved by the relevant government authorities.

Sales of heat energy to customers are pursuant to the heat energy purchase agreements entered into between the Group and the customers. The Group's sales of heat energy are made to the customers at the tariff rates approved by the Beijing Municipal Commission of Development and Reform.

For sales of electricity and heat energy, revenue is recognized when control of electricity and heat has been transferred, being when electricity and heat is supplied to the power grid companies and the customers. The normal credit term is 60 days upon electricity and heat is supplied. There is no significant financing component among the payment terms of sales of electricity and heat.

Pursuant to a notice issued by the Beijing Municipal Finance Bureau, effective on 1 January 2024, the Group has no longer received gas-fired power generation subsidies from the Beijing Municipal Finance Bureau. This amount has been incorporated into the electricity tariff rates of State Grid Corporation of China. Consequently, the amount entitled in the first half of 2024 has been reclassified from other income to electricity sales revenue.

3B. SEGMENT INFORMATION

(a) Segment revenue and results

The Group manages its businesses by divisions, such as performing the monthly revenue analysis by segments which are organized by types of business. Information is reported internally to the Group's chief operating decision maker ("CODM"), including general manager, deputy general managers and chief accountant, for the purposes of resource allocation and performance assessment. The Group has presented the following operating and reportable segments.

- Gas-fired power and heat energy generation: constructing, managing and operating natural gas-fired power plants and generating electric power and heat energy for sale to external customers.
- Wind power: constructing, managing and operating wind power plants and generating electric power for sale to external customers.
- Photovoltaic power: constructing, managing and operating photovoltaic power plants and sales of electricity generated to external customers.
- Hydropower: managing and operating hydropower plants and sales of electricity generated to external customers.

Operating segments other than "Gas-fired power and heat energy generation", "Wind power", "Photovoltaic power" and "Hydropower" did not meet the quantitative thresholds for reportable segments in both current period and prior period. Accordingly, these are grouped and presented as "Others" in the segment information.

An analysis of the Group's reportable segment revenue and results for the six months ended 30 June 2024 and 2025 by operating and reportable segment is as follows:

	Gas-fired power and heat energy
2024	220.27
2025	1.61

PRC enterprise income tax has been generally provided at the applicable enterprise income tax rate of 25% on the estimated assessable profits of the group companies established in the PRC for the six months ended 30 June 2025.

Under the PRC Enterprise Income Tax law, the preferential tax treatment for encouraged enterprises located in the Western China and certain industry-oriented tax incentives remain available up to 31 December 2030 when the original preferential tax period expired. Under the enterprise income tax law, the enterprises in encouraged industries in Western China are eligible for a preferential enterprise income tax rate for the period from 1 January 2021 to 31 December 2030. A PRC enterprise which enjoys this tax treatment is entitled to a preferential tax rate of 15%, and may also begin to enjoy the "three-year tax exemption followed by three years of 50% tax reduction" corporate income tax incentive in China starting from the first year in which taxable income is generated from the relevant projects. Certain wind power plant projects and photovoltaic power generation projects of the Group are eligible for this tax incentive as of 30 June 2025.

No provision for Hong Kong Profit Tax has been made as the Group has no assessable profit derived in Hong Kong.

Australian income tax is calculated at 30% of the estimated assessable profit.

15. CASH AND CASH EQUIVALENTS

The Group's cash and cash equivalents comprise cash on hand, deposits with banks and a related non-bank financial institution with an original maturity of 3 months or less and short-term deposits depending on the immediate cash requirements of the Group. Deposits with banks and a related non-bank financial institution carry prevailing market interest rate.

The Group had deposits of approximately RMB6,438,845,000 (as at 31 December 2024: RMB6,472,948,000) placed with 京能集團財務有限公司 (BEH Finance Co., Ltd., English name for identification purpose) ("BEH Finance", a non-bank financial institution approved by China Banking and Insurance Regulatory Commission as at 30 June 2025). Such deposits are short-term and are subject to an insignificant risk of changes in value, and accordingly, the balances as at 30 June 2025 and 31 December 2024 have been regarded as cash and cash equivalents.

16. TRADE AND OTHER PAYABLES

	As at 30 June 2025 RMB'000 (Unaudited)	As at 31 December 2024 RMB'000 (Audited)
Trade payables	2,644,666	2,467,597

20. PERPETUAL NOTES

(a) Issued on 10 July 2023

The Company issued perpetual medium-term notes at par value on 10 July 2023, with a total principal amount of RMB500,000,000 ("Perpetual Notes 1"). The proceeds from the issuance of the Perpetual Notes after netting off the issuance cost are RMB498,800,000.

The coupon rate for the first three years up to 12 July 2026 is 3.19% per annum, which is paid annually in arrears on 12 July in each year ("Coupon Payment Date 1"). The Company may defer any interest at its own discretion unless compulsory coupon payment events (including distributions to ordinary shareholders of the Company or reduction of the registered capital of the Company) have occurred. The deferred interest is interest bearing at the current coupon rate during the interest deferral period.

The Perpetual Notes have no fixed maturity and are callable at the Company's option, on 12 July 2026 or on any Coupon Payment Date afterwards, at their principal amounts together with any interest payable, unpaid or deferred coupon interest payments.

After 12 July 2026, the coupon rate will be reset every three years to a percentage per annum equal to the sum of (i) the initial spreads of difference between nominal interest rate and initial benchmark interest rate, (ii) current period benchmark interest rate, and (iii) a margin of 300 base points per annum. While any coupon interest payments are unpaid or deferred, the Group cannot declare or pay dividends (except for handing in the state-owned capital proceeds required by relevant regulations of state-owned assets management) or reduce its registered capital.

20. PERPETUAL NOTES (Continued)

(b) Issued on 21 December 2023

The Company issued perpetual medium-term notes at par value on 21 December 2023, with a total principal amount of RMB500,000,000 ("Perpetual Notes 2"). The proceeds from the issuance of the Perpetual Notes after netting off the issuance cost are RMB498,800,000.

The coupon rate for the first three years up to 25 December 2026 is 3.09% per annum, which is paid annually in arrears on 25 December in each year ("Coupon Payment Date 2"). The Company may defer any interest at its own discretion unless compulsory coupon payment events (including distributions to ordinary shareholders of the Company (except for handing in the state-owned capital proceeds required by relevant regulations of state-owned assets management) or reduction of the registered capital of the Company) have occurred. The deferred interest is interest bearing at the current coupon rate during the interest deferral period.

The Perpetual Notes have no fixed maturity and are callable at the Company's option, on 25 December 2026 or on any Coupon Payment Date afterwards, at their principal amounts together with any interest payable, unpaid or deferred coupon interest payments.

After 25 December 2026, the coupon rate will be reset every three years to a percentage per annum equal to the sum (i) of the initial spreads of difference between nominal interest rate and initial benchmark interest rate, (ii) current period benchmark interest rate, and (iii) a margin of 300 base points per annum. While any coupon interest payments are unpaid or deferred, the Group cannot declare or pay dividends (except for handing in the state-owned capital proceeds required by relevant regulations of state-owned assets management) or reduce its registered capital.

(c) Issued on 25 November 2024

The Company issued perpetual medium-term notes at par value on 25 November 2024, with a total principal amount of RMB1,000,000,000 ("Perpetual Notes 3"). The proceeds from the issuance of the Perpetual Notes after netting off the issuance cost are RMB999,200,000.

The coupon rate for the first three years up to 27 November 2027 is 2.30% per annum, which is paid annually in arrears on 27 November in each year ("Coupon Payment Date 3"). The Company may defer any interest at its own discretion unless compulsory coupon payment events (including distributions to ordinary shareholders of the Company (except for handing in the state-owned capital proceeds required by relevant regulations of state-owned assets management) or reduction of the registered capital of the Company) have occurred. The deferred interest is interest bearing at the current coupon rate during the interest deferral period.

The Perpetual Notes have no fixed maturity and are callable at the Company's option, on 27 December 2027 or on any Coupon Payment Date afterwards, at their principal amounts together with any interest payable, unpaid or deferred coupon interest payments.

After 27 November 2027, the coupon rate will be reset every three years to a percentage per annum equal to the sum (i) of the initial spreads of difference between nominal interest rate and initial benchmark interest rate, (ii) current period benchmark interest rate, and (iii) a margin of 300 base points every year. While any coupon interest payments are unpaid or deferred, the Group cannot declare or pay dividends (except for handing in the state-owned capital proceeds required by relevant regulations of state-owned assets management) or reduce its registered capital.

Pursuant to the terms of these Perpetual Notes, the Company has no contractual obligation to repay its principal or to pay any coupon and deferred interest unless compulsory coupon payment event has occurred. Accordingly, the Perpetual Notes are classified as equity and subsequent coupon payment will be recorded as equity distribution to the owners of the Company.

20. PERPETUAL NOTES (Continued)

(d) Issued on 26 June 2025

The Company issued perpetual medium-term notes at par value on 26 June 2025, with a total principal amount of RMB1,000,000,000 ("Perpetual Notes 4"). The proceeds from the issuance of the Perpetual Notes after netting off the issuance cost are RMB999,900,000.

The coupon rate for the first three years up to 27 June 2028 is 1.98% per annum, which is paid annually in arrears on 27 June in each year ("Coupon Payment Date 4"). The Company may defer any interest at its own discretion unless compulsory coupon payment events (including distributions to ordinary shareholders of the Company (except for handing in the state-owned capital proceeds required by relevant regulations of state-owned assets management) or reduction of the registered capital of the Company) have occurred. The deferred interest is interest bearing at the current coupon rate during the interest deferral period.

The Perpetual Notes have no fixed maturity and are callable at the Company's option, on 27 June 2028 or on any Coupon Payment Date afterwards, at their principal amounts together with any interest payable, unpaid or deferred coupon interest payments.

After 27 June 2028, the coupon rate will be reset every three years to a percentage per annum equal to the sum (i) of the initial spreads of difference between nominal interest rate and initial benchmark interest rate, (ii) current period benchmark interest rate, and (iii) a margin of 300 base points every year. While any coupon interest payments are unpaid or deferred, the Group cannot declare or pay dividends (except for handing in the state-owned capital proceeds required by relevant regulations of state-owned assets management) or reduce its registered capital.

Pursuant to the terms of these Perpetual Notes, the Company has no contractual obligation to repay its principal or to pay any coupon and deferred interest unless compulsory coupon payment event has occurred. Accordingly, the Perpetual Notes are classified as equity and subsequent coupon payment will be recorded as equity distribution to the owners of the Company.

During the period ended 30 June 2025, the profit attributable to holders of the Perpetual Notes, based on the applicable coupon rate, was approximately RMB36,359,000 (for the period ended 30 June 2024: RMB63,650,000) and the coupon interest payments distributed to the holders of the perpetual notes were approximately RMB32,000,000 (for the period ended 30 June 2024: RMB32,000,000).
